

WOW RACE 3 2016

WOW had their third race of the season last Thursday. With dying winds and favourable tides the course was set so that the boats were to finish from the west via the Otumoetai channel. Many boats were flying a spinnaker what became quit shy around the last channel mark before the finish line. High Point was leading until 100 metres from the finish and fell into a hole. General Jackson, Whatever and Truxton caught up and also fell in to the same hole. We all ended up be dragged over the finish line mainly by the tide. It was a very close finish with Truxton finishing 1 second ahead of General Jackson, Whatever 30 second behind the General and High Point 30 seconds later.

It just goes to show that the race is not over until you are over the line.
